

Multi Crop Raised Bed Planter

Multi Crop Raised Bed Planter

- ❖ Save Fuel & Time.
- ❖ Good Germination.
- ❖ Proper Distribution of Seeds & Fertilizer.
- ❖ Improve Soil Health.
- ❖ Environment Friendly.
- ❖ Less Maintenance Required.

Multi Crop Raised Bed Planter is used for sowing bold grains like maize, groundnut, peas, cotton, sunflower etc. On the raised bed formed by ridgers. The planting discs for different crops can be changed without dismantling the seed hoppers main shaft. Missing of grains and grains damage is negligible. Fertilizer can be used simultaneously according to requirement. Roller is provided for shaping the raised bed properly and covering the seeds.
