MECHANIZED AGRICULTURE FOR PRODUCTIVITY

Reversible Mould Board Plough

Mounted Mould Board Plough

- ❖ Better fuel efficiency
- ❖ Less maintenance cost
- ❖ Enhance Productivity
- ❖ Adjustment of the furrow as per the soil conditions
- ❖ Reduce operator fatigue

A robust designed agricultural implement used for turning the soil levels upside down, incorporating soil reduces and making available more fertile layer for the new crop. It provides deep seed bed preparation with proper aeration and efficient residue incorporation. MB Plough is used as a primary tillage implement for soft and hard soil.

TECHNICAL SPECIFICATION

Model	MBR1	MBR2	MBR3
Number of Furrows	1	2	3
Working Width	350 mm	700 mm	1100 mm
Working Depth	250 mm - 355 mm		
Min. HP Required	55	65	85
Hitch Type	3 Point Hitch, Cat-II		
Safety	Shear Bolt		
Tine Thickness	36 mm		
Weight (Kg) Approx	265	440	600

**Company reserves the rights to change/amend products specifications without any prior notice.*
