

Seed Cum Fertilizer Drill

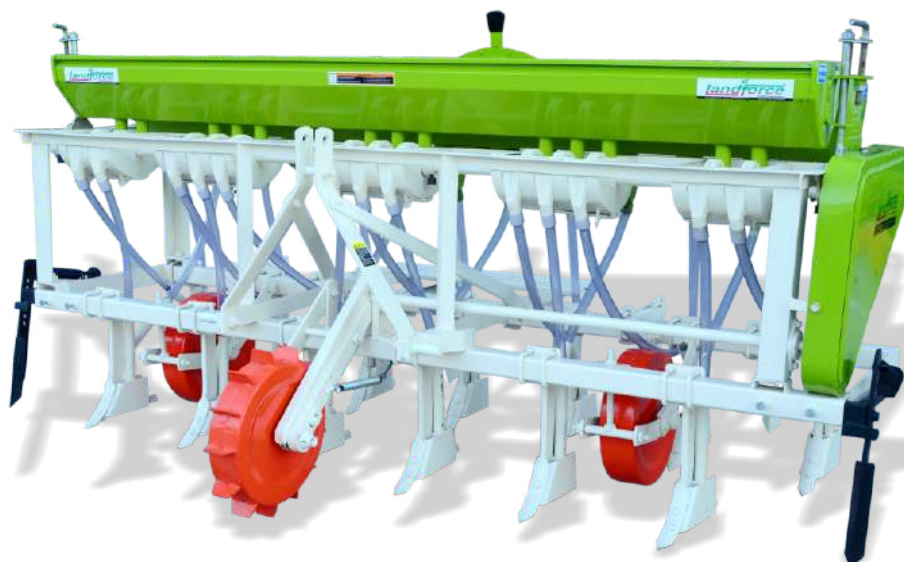

Conventional Model

Seed Cum Fertilizer Drill

Conventional Model

- ❖ Save Fuel & Time
- ❖ Good Germination
- ❖ Proper Distribution of Seeds & Fertilizers
- ❖ Improve Soil Health
- ❖ Environment Friendly

Landforce seed cum fertilizer drill is used for simultaneous activities of Seeding and Fertilization process in a single operation. It can be retrofitted to a tractor of 35 HP and above. It drill seeds and fertilizer together but delivers them separately in a single drive. Seed and Fertilizer are drilled at different depths thus improves germination. there are separate containers for seed and fertilizer.

TECHNICAL SPECIFICATION

Model	SDC9	SDC11	SDC13
Overall Width	80"	95"	105"
Height	47"	47"	47"
Seeding Width (Row Seeding)	60"	75"	90"
Weight (kg) Approx.	295	325	375
Hitch Type	Cat-II		
No of Tines	9	11	13
Type of Tines	Shovel Type		
Seed Metering	Aluminium type fluted roller		
Fertilizer Metering Device	Cell Type		
Row Spacing	7.5"	7.5"	7.5"
No. of Seed Covering Device	4 nos	5 nos	6 nos
No. of Row Marker	1 nos	1 nos	2 nos
Min. H.P. required	35	40	45
